Sullivan Process Controls has been selling market-leading brands of instrumentation and control valves for more than 30 years. Product and service offerings include the best remanufactured products on the market, major brands in new surplus as well as factory new, a full service/repair facility, on-site field service/support, and project engineering services. Emerson® products such as Fisher®, Fisher Regulators®, Rosemount®, and MicroMotion® are among those market-leading brands we specialize in. Other major brands we provide include Invensys®-Foxboro®, Siemens®-Moore®, Honeywell®, Taylor®, and Belgas®.

Our 24,000 sq. ft. warehouse is stocked with all major brands of instruments and valves ready to be rebuilt to your specifications. All of our products are rebuilt to exacting standards, and calibrated using the latest calibration technology available. Our products are then shipped to you looking “like-new” and ready to install with a standard 2 year warranty.

We offer remanufactured/surplus equipment for considerable savings off retail and although we might not be the largest among the competition, we are the best by far! Our main goal is to meet every customer’s individual needs by providing high-quality products and services with quick lead times. The business of remanufactured instrumentation and control valves is an economically important and competitive market and we differentiate ourselves by providing a superior product, top-notch service/support, and specialized customer care.

Call us today. We look forward to serving you!
